**WIRE USAGE CHART****92963713**

<b>WIRE</b>	<b>WIRE COLOR</b>	<b>GA.</b>	<b>CIRCUIT DESCRIPTION</b>
9	dk blue	18	Voltage regulator "FLD" terminal to generator "FLD" terminal
10a	brown	12	Voltage regulator "ARM" terminal to generator "ARM" terminal
10b	brown	18	Dash generator Indicator light to generator
11	lt blue	18	Headlight switch "HEAD" terminal to dimmer switch "BAT" terminal
12a	orange	18	Rear body connector to stop light switch
12b	orange	18	Headlight switch "STOP" terminal to stop light switch
13	white	18	Steering column connector to stop light switch connector
14	black	18	Headlight switch "TAIL" terminal to rear body connector
15	tan	18	Horn button connector to Horn relay
16a	red	12	In-line battery power splice to voltage regulator "BAT" terminal
16b	red	14	In-line battery power splice to horn relay "BAT" terminal
16c	red	14	Headlight switch "BAT" terminal to in-line battery power splice
16d	red	18	Glove box light power lead to in-line battery power splice
16e	red	18	Clock power lead to in-line battery power splice
16f	red	16	Cigarette lighter power lead to in-line battery power splice
16h	red	12	In-line battery power splice to ignition switch "BAT" terminal
16j	red	12	In-line battery power splice (internal wire that does not appear on the wire chart)
17	yellow	18	Steering column connector to turn signal flasher
18	brown	18	Rear body connector fuel sender lead wire to fuel gauge
19a	gray	18	Clock light lead to in-line instrument light splice
19b	gray	18	Ignition switch light lead to in-line instrument light splice
19c	gray	18	Dash light to in-line instrument light splice
19d	gray	18	Dash light to in-line instrument light splice
19e	gray	18	Dash light to in-line instrument light splice
19f	gray	18	Headlight switch "PANEL" terminal to in-line instrument light splice
20	white	18	Headlight switch "DOME" terminal to rear body connector

This layout is for instruction sheets by wire number and wire suffix
