

1947-59 - CHEVROLET / GMC TRUCK FUEL SENDER

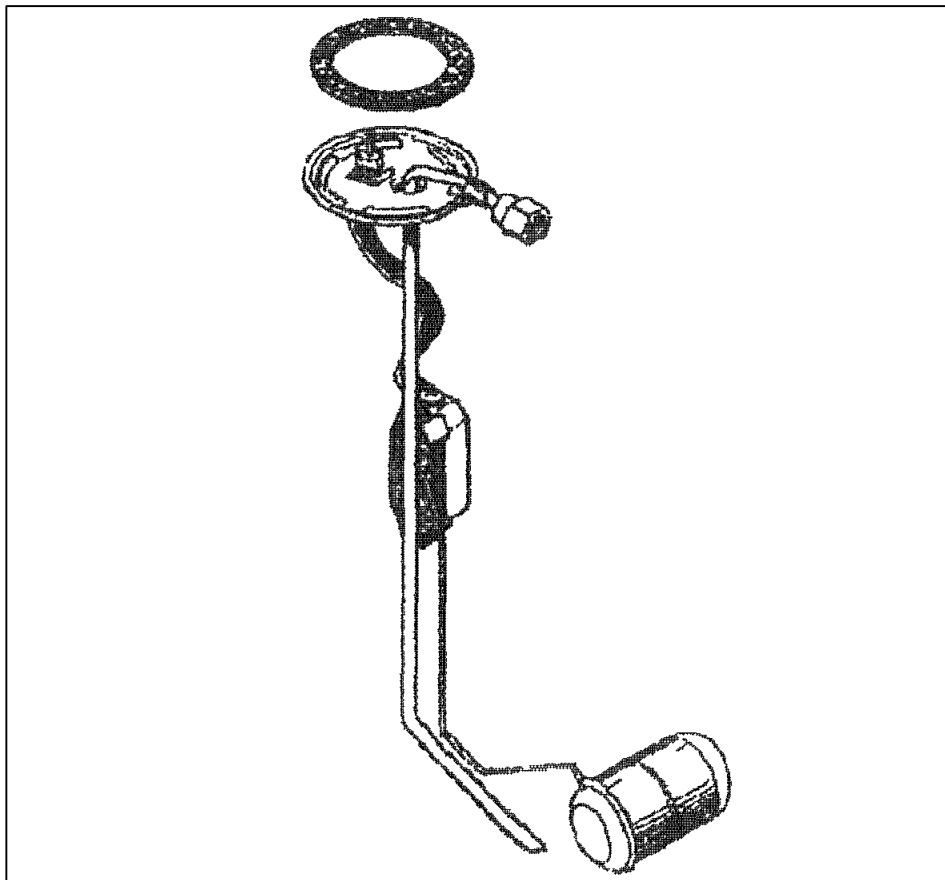

**Please Note: this fuel sender is sold for 1947-59 Chevrolet / GMC Truck.*

1947-55 - 1ST SERIES TRUCK

Originally, 1947-55 1st series trucks used a fuel sender which did not have a fuel pick-up. The original 1947-55 1st series truck fuel tanks were gravity fed and the fuel line attached at the bottom of the tank. (It did not have a separate fuel pick-up on the fuel sender) If you are using this fuel sender in an original 1947-55 1st series truck and are to continue to use the gravity fed fuel line, use the brass threaded cap (enclosed) to block off the top fuel sender feed.

1956-59 - 2ND SERIES TRUCK

No modifications necessary.
