# ***Buy with Confidence !***

## **Made in the U.S.A.**

All of our harnesses are hand assembled in the U.S.A.

## **Correct Color Wires**

Our harnesses always match the original factory color codes and gauge sizes. We use U.S.A. made Cross Linked Polyethylene type GXL wire which is much more tolerant to heat than the original PVC type GPT wire that was used from the factory.

## **Dip Soldered (when applicable)**

All terminals are dip soldered (when applicable) to limit resistance loss.

## **Correct Connectors & Terminals**

With over 300,000 connectors and terminals in stock you can be sure the harness you receive will look identical to the original.

## **Correct Non-Adhesive & Cloth Tapes**

All harnesses are wrapped with the correct non-adhesive or cloth woven tapes to assure a 100% factory appearance.

## **Technical Support**

We don't expect our customers to be "wiring-wizards", you can call us direct with any technical questions you may have.

## **Custom Modifications**

Custom modifications are available to allow you to convert from an external regulated alternator to an internal regulated alternator. This modification is available for most '63 and up GM cars and trucks. We can also convert many of our engine harnesses to work with H.E.I. distributors and electric chokes. Our modifications retain the factory appearance. Call our Customer Service Department for more details.

## **Reproduction Switches**

We manufacture an extensive line of reproduction switches. These include Turn Signal, Backup Light, Neutral Safety, Wiper, Headlight Switches and others. As with all of our restoration products our switches will fit and function perfectly, just like the originals.

## **Guarantee & Warranty**

We are so confident in the quality of all of our restoration products that we offer the following guarantee and warranty. If you are not 100% satisfied with the quality of any of our restoration products we will give you a full refund. Just return the unused item within 30 days of receipt for a full refund. We also offer a full 1 year replacement warranty on all of the products we sell (see our product warranty sheet for more info).

## **Method of Payment**

We accept Visa, Master Card, American Express and Discover. If you prefer to pre-pay your order, we accept Money Orders, Cashiers Checks or Personal Checks. C.O.D. shipments are also available.

# **Classic Auto Fuse Series Dash Harnesses**

**Now Available for 1968-1972 Chevelle & El Camino**

**Factory replacement style Dash Harnesses with ATO Type fuse blocks**

**No cutting, modifying of any sort required !**

Our new Classic Auto Fuse Series Dash Harnesses allow the professional restorer to maintain the easy plug and play function of original factory type harnesses, while converting the entire fuse block to an Auto Fuse Series (ATO Type) fuse block. The Classic Auto Fuse Series Dash Harnesses give restorers the flexibility to add additional power circuits, without the installation headaches normally associated with this type of fuse box conversion.

The plug and play Classic Auto Fuse Series Dash Harnesses are a first in the industry. Don't be fooled by clever advertising and claims by others that their do-it-yourself harnesses are easy to install. There is no other product like this on the market anywhere.

***There is no cutting, modifying or altering of any sort required. Just plug it in and turn it on, it's that simple. The Classic Auto Fuse Dash Harnesses are completely compatible with the remaining harnesses in the car; couple that with our world renowned technical support for the finest product money can buy.***

*Browse our catalog for specific applications, part numbers and prices*

## **Features an ATO Type Fuse Block**

ATO Type Fuse Block with additional, fully integrated power ports allow the restorer to easily tap power for aftermarket electronic devices such as audio accessories, electric fans & ignition boxes.

## **Features Factory Type Connectors**

Original factory type connectors are used on every wire. Wire colors match the OEM specs, but heavier gauge wires are used on the appropriate power circuits to accommodate aftermarket accessories.

# Classic Auto Fuse Series Dash Harnesses

## Check Out These Outstanding Features

### • Upgraded Main Power Circuits

The main power circuits have been upgraded to ensure the extra capacity of the new Classic Auto Fuse Series fuse block. No need to worry about splicing onto existing fuses and circuits for aftermarket type accessories and overloading the fuse.

### • Three Constant Battery Power Accessory Ports

Original Glass Series fuse boxes have only one port. These 3 ports supply constant battery power regardless of the ignition switch position. Each of these ports has a maximum fuse capacity of 10 amps.

### • One Instrument Cluster Lamps Accessory Port

Original Glass Series fuse boxes have only one port. This port is used to access the rheostat circuit on the headlamp switch, so the optional lamps connected to this port will dim and brighten with the dash lamps. This port has a maximum fuse capacity of 1 amp which is perfect for night lights in tachs and gauges etc.

### • Two Ignition Power Accessory Ports

Original Glass Series fuse boxes have only one port. These 2 ports supply switched battery power when the ignition switch is in the run position only. Each of these ports has a maximum fuse capacity of 5 amps.

### • Two Accessory Power Accessory Ports

Original Glass Series fuse boxes have only one port. These two ports supply switched battery power when the ignition switch is in the run or accessory position only. Each of these ports has a maximum fuse capacity of 5 amps.

### • Three Spare Fuse Ports

These three Spare Fuse Ports have an undefined fuse rating that can be designed by the customer based on the individual need and each port can handle up to 20 amps per cavity. If all three are not used, restorers may increase the remaining individual fuse ratings up to 30 amps for the remaining one to two cavities. In order to use these spare fuses, the optional kit part number 39383 "Spare Fuse Power Wiring Extension Harness" will be required. Instructions are included with this kit.

## Optional Items for Classic Auto Fuse Series Dash Harnesses

### Spare Fuse Power Wiring Extension Harness

Used to add the functionality of the three extra spare fuses if desired. If this kit is not purchased the three spare fuses will not function.

Part Number 39383 1968-1972 Chevelle/El Camino Retail \$70.00

### Accessory Connector and Terminal Kit

The connectors and terminals in this kit are used to access the front of the Classic Auto Fuse Series fuse block accessory ports, while maintaining the indexing capability of the cavities on the fuse block. Use of this kit helps ensure that you do not plug accessories into the wrong port.

Part Number 39384 1968-1972 Chevelle/El Camino Retail \$24.00

### Glass Fuse Series Accessory Adapter Kit

This kit is used to convert any old accessory style indexed connectors designed to plug into a specific port on the old Glass Fuse Series fuse block. The adapters allow you to plug the leads into the appropriate port on the new Classic Auto Fuse Series fuse block without any modifications to the old accessory leads. The best part is that you will still have the extra accessory ports designed into the new Classic Auto Fuse Series Dash Harnesses for new or aftermarket options without sacrificing valuable accessory ports on the fuse block.

Part Number 39385 1968-1972 Chevelle/El Camino Retail \$63.00

### Fuse & Flasher Kit

Contains two flashers, one complete set of ATO fuses, plus one spare of each amperage. Does not contain fuses for the three spare cavities.

## **Alternator Conversion Kit External to "SI" Type Internal**

Our most popular Alternator Conversion Kit. This kit makes it easy to convert from an External Regulated Alternator to an "SI" Type Internal Regulated Alternator. Kit includes both adapters and an instruction sheet.

Easy to install:

1) Disconnect the external voltage regulator leads and plug our "Special Regulator Adapter" into the voltage regulator lead wires. 2) Disconnect the alternator lead wires. 3) Install new "SI" Type Internal Regulated alternator. 4) Plug one end of our "Alternator Adapter" into the original alternator lead wires and the other into the alternator.

*Typical application is '63-'74 GM Cars & Trucks, see carline catalogs for specific application information.*

Part #27555

Retail \$34.00

## **Alternator Conversion Kit External to "CS" Type Internal**

This kit makes it easy to convert from an External Regulated Alternator to a "CS" Type Internal Regulated Alternator. Kit includes both adapters and an instruction sheet.

Easy to install:

1) Disconnect the external voltage regulator leads and plug our "Special Regulator Adapter" into the voltage regulator lead wires. 2) Disconnect the alternator lead wires. 3) Install new "SI" Type Internal Regulated alternator. 4) Plug one end of our "Alternator Adapter" into the original alternator lead wires and the other into the alternator.

*Typical application is '63-'74 GM Cars & Trucks, see carline catalogs for specific application information.*

Part #37787

Retail \$35.00

## **Alternator Conversion Kit "SI" Type Internal to CS130/CS144 Type Internal**

Allows for an easy conversion from an "SI" type internal regulated alternator to a "CS130" or "CS144" type internal regulated alternator. Simple to install, the mating end of the adapter pigtail plugs perfectly to the original alternator connector, and the other end plugs right into any "CS130" or "CS144" type alternator. Kit includes adapter pigtail and an instruction sheet.

*Typical application is '69-'84 GM Cars & Trucks, see carline catalogs for specific application information.*

Part #37796

Retail \$26.00

## **Alternator Conversion Kit**

### **"SI" Type Internal to "CS130D" Type Internal**

Allows for an easy conversion from an "SI" type internal regulated alternator to a "CS130D" type internal regulated alternator. Simple to install, the mating end of the adapter pigtail plugs perfectly to the original alternator connector, and the other end plugs right into any "CS130D" type alternator. Kit includes adapter pigtail and an instruction sheet.

Typical application is '69-'84 GM Cars & Trucks, see carline catalogs for specific application information.

# **Breakerless SE Single Wire Ignition**

***Simple 1 Wire Hook-Up, just connect the original points wire to the module***

***Completely stock appearance***

***Emissions Legal in all 50 States***

***Three year warranty***

The Breakerless SE allows you to convert any 1957 to 1974 GM, AMC or Jeep V8 breaker point type distributor (with a windowed type distributor cap) to a reliable solid-state electronic ignition, utilizing a fully integrated trigger and power module that fits completely inside the distributor. Unlike competitive systems though, no additional wires protrude from the distributor, only the original points wire. The result is a state-of-the-art ignition with an absolutely stock appearance. The Breakerless SE is so unique that it's patented !

## **Outstanding features of this unit include:**

- Single wire operation to preserve stock appearance and simplify wiring.
- Active dwell control maintains high rpm spark energy while reducing coil heating at idle.
- Auto-standby prevents coil damage or dead battery if the ignition is accidentally left on.
- Hall effect rotary-vane sensor design compensates for worn bearings and distributor end play. Magnetic sensor is unaffected by oil, dirt or other contaminants, unlike optical systems.
- Over-voltage/over-current protected against damage from high amp battery chargers, reversed battery, or improper wiring.
- Constructed with premium quality components. Sealed, hi-temp thermoplastic housing provides exceptional resistance against moisture and vibration.
- No distributor modification, disassembly, or removal is required.

Kit comes complete with everything you'll need to install the Breakerless SE Single Wire Ignition. Kit includes: 1 Module, 1 (two-piece) vane, all necessary installation hardware and a comprehensive instruction sheet.
