Part #VET

Buy with Confidence !

Made in the U.S.A.

All of our harnesses are hand assembled in the U.S.A.

Correct Color Wires

Our harnesses always match the original factory color codes and gauge sizes. We use U.S.A. made Cross Linked Polyethylene type GXL wire which is much more tolerant to heat than the original PVC type GPT wire that was used from the factory.

Dip Soldered (when applicable)

All terminals are dip soldered (when applicable) to limit resistance loss.

Correct Connectors & Terminals

With over 300,000 connectors and terminals in stock you can be sure the harness you receive will look identical to the original.

Correct Non-Adhesive & Cloth Tapes

All harnesses are wrapped with the correct non-adhesive or cloth woven tapes to assure a 100% factory appearance.

Technical Support

We don't expect our customers to be "wiring-wizards", you can call us direct with any technical questions you may have.

Custom Modifications

Custom modifications are available to allow you to convert from an external regulated alternator to an internal regulated alternator. This modification is available for most '63 and up GM cars and trucks. We can also convert many of our engine harnesses to work with H.E.I. distributors and electric chokes. Our modifications retain the factory appearance. Call our Customer Service Department for more details.

Reproduction Switches

We manufacture an extensive line of reproduction switches. These include Turn Signal, Backup Light, Neutral Safety, Wiper, Headlight Switches and others. As with all of our restoration products our switches will fit and function perfectly, just like the originals.

Guarantee & Warranty

We are so confident in the quality of all of our restoration products that we offer the following guarantee and warranty. If you are not 100% satisfied with the quality of any of our restoration products we will give you a full refund. Just return the unused item within 30 days of receipt for a full refund. We also offer a full 1 year replacement warranty on all of the products we sell (see our product warranty sheet for more info).

Method of Payment

We accept Visa, Master Card, American Express and Discover. If you prefer to pre-pay your order, we accept Money Orders, Cashiers Checks or Personal Checks. C.O.D. shipments are also available.

Breakerless SE Single Wire Ignition

Simple 1 Wire Hook-Up, just connect the original points wire to the module

Completely stock appearance

Emissions Legal in all 50 States

Three year warranty

The Breakerless SE allows you to convert any 1957 to 1974 GM, AMC or Jeep V8 breaker point type distributor (with a windowed type distributor cap) to a reliable solid-state electronic ignition, utilizing a fully integrated trigger and power module that fits completely inside the distributor. Unlike competitive systems though, no additional wires protrude from the distributor, only the original points wire. The result is a state-of-the-art ignition with an absolutely stock appearance. The Breakerless SE is so unique that it's patented !

Outstanding features of this unit include:

- Single wire operation to preserve stock appearance and simplify wiring.
- Active dwell control maintains high rpm spark energy while reducing coil heating at idle.
- Auto-standby prevents coil damage or dead battery if the ignition is accidentally left on.
- Hall effect rotary-vane sensor design compensates for worn bearings and distributor end play. Magnetic sensor is unaffected by oil, dirt or other contaminants, unlike optical systems.
- Over-voltage/over-current protected against damage from high amp battery chargers, reversed battery, or improper wiring.
- Constructed with premium quality components. Sealed, hi-temp thermoplastic housing provides exceptional resistance against moisture and vibration.
- No distributor modification, disassembly, or removal is required.

Kit comes complete with everything you'll need to install the Breakerless SE Single Wire Ignition. Kit includes: 1 Module, 1 (two-piece) vane, all necessary installation hardware and a comprehensive instruction sheet.

Transistor Ignition Replacement Module

Drop-In Replacement Module fits all Chevrolet & Pontiac cars equipped with the rare and optional Transistor Ignition System

Drops into the Original Finned Amplifier Housing

Quicker Starts

Improved Performance

M&H's Transistor Ignition Replacement Module is a drop-in performance upgrade, and provides state-of-the-art ignition technology. This replacement module generates twice the coil primary voltage providing up to 10% more available secondary voltage with the factory T.I. coil. It also can be used with point type or aftermarket coils or M&H's own T.I. Replacement Coil. It provides output protection against failure caused by broken or disconnected plug wires, and has an extended temperature range to over 300-degrees. The state-of-the-art electronics are completely sealed in thermoplastic to keep water and contaminants out. Superior construction provides superior performance, just like all M&H Electric's products.

Simple to Install

- Remove the backing plate from your original amplifier housing
- Remove wiring from original circuit board and unscrew it from the housing
- Thoroughly clean the inside of the housing
- Screw in M&H's new T.I. Replacement Module and attach the wiring
- ***That's it, you'll enjoy Quicker Starts and Improved Performance***

Fits all Chevrolet & Pontiac cars with Transistor Ignition
